

Team Skills

Taking P.R.I.D.E™ helps create an organizational climate of excellence based on individual responsibility. It is designed to assist participants to perform at the highest level of maturity – the responsible level. Participants learn to set and achieve realistic and measurable goals, successfully take action for their success, stimulate and sustain self-motivation. Responsible employees know what needs to be done and they take responsible action to ensure things get done.

Team Training™ complements your current team management approach and raises team members' awareness and desire to improve. Modules include: continuous improvement, working with your team leader, health and safety, human relations, communication, spirit of service, housekeeping and building job security. You assure your success as you empower your team!

Grow teamwork in your organization with **Implementing Work Teams™**. Start by creating improvement action teams to set the stage and move towards self-directed teams. Includes empowering others and using a productive problem-solving system. Emphasize using group leaders as coaches and consultative partners.

Team Up For Action™ introduces total employee involvement to all team members. Set up improvement action teams and, as appropriate, self-directed teams. Includes multi-functional teams for company-wide communication and coordination as well as a systematic problem-solving system. Learn to create a work team coordinating committee to provide staff support and instill a continuous improvement attitude.

Systematic Problem Solving™ is a unique team problem-solving system that develops new solutions to tough problems. This in-depth problem solving system leads to action and is simple, yet very effective. Can also be used with Client or Account Management Team situations for relationship building.

Creating PowerTeams™ is a process that enables people to distinguish differences between a group and a **PowerTeam™**. Participants learn to set realistic achievable goals through team involvement and commitment. Open communication and constructive feedback is promoted to encourage expression of new ideas, improve work methods and help individuals become more effective in team problem-solving.
